

**SINCE 1961, EXPERIENCE, QUALITY, SERVICE  
AND WARRANTY "MADE IN ITALY"**

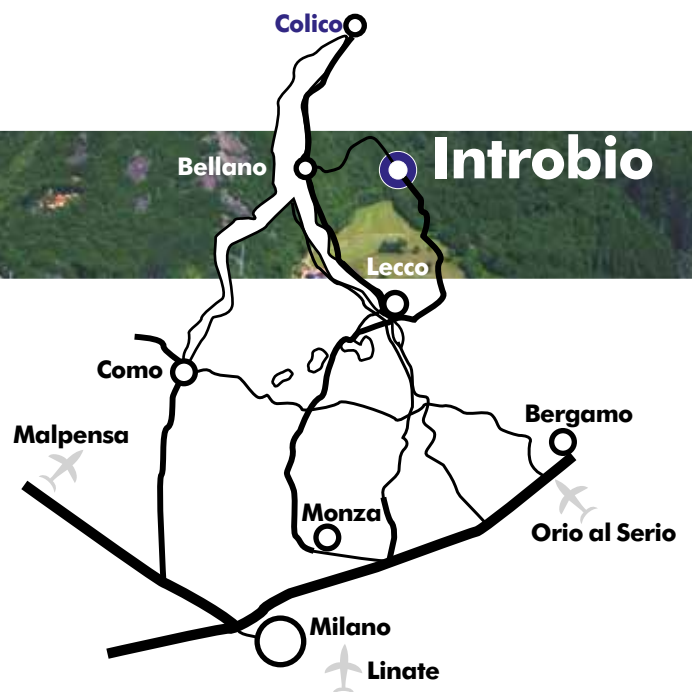

OFFICINA COLOMBO is a company located in the municipality of Introbio, which is part of the Lecco engineering district full of many companies specializing in mechanical manufacturing and specializing in automatic turning precision.

Since 1961 it produces turned parts of different types and materials for companies in various industries. In addition to contract manufacturing, it has its own range of products dedicated to hardware and security with high quality work and finishes.

Technological innovation, process flexibility and large production capacity put OFFICINA COLOMBO in a prestigious position in the Italian market, with a steady increase in volumes in foreign markets.

OFFICINA COLOMBO has also developed partnerships with other companies for the construction of non-strategic processes and the University for the development of products for their customers.
